

April 16, 1986

TO: Noncoal File *SCL*
FROM: Susan C. Linner, Reclamation Biologist/ Permit Supervisor
RE: Site Inspection, DOE/021/002, Iron County, Utah

On April 8, 1986 the "B" permitting team visited the area of the claims incorporated as DOE/021/002. The area, which can be located on the Silver Peak USGS quadrangle map, is very rugged with few roads leading into the mountains. Several dirt roads were explored, none of which led to any areas which showed evidence of recent mining activity. None of the roads examined were in good enough shape to be used for equipment or ore haulage. It appears that no activity has been undertaken on these claims.
